PRODUCT'S RANGE PLUS

Easy handling of pots and pans thanks to worktop flush, shatterproof glass.

A temperature control knob allows to select a heating zone of two different sizes in order to suit the pan bottom.

Thermostatically controlled temperature range from 70 to 450°C.

Thanks to the IPX5 water jet ingress protection rating, awarded after passing specific tests, knobs and knob bezels can be washed at the end of the working day without affecting performance or safety.

The front bar is a comfortable place for the chef to lean on; it means you will remain at a safe distance from the worktop and therefore protects from accidentally knocking against both items lying on the worktop and the knobs.
