

# *KLIMA FISH*

*The new frontier in the world of fish ageing*

KLIMA FISH, the latest patented ageing device born in the Zernike house, overturns the established paradigms on fish processing.

The precision of the electronic control allows precise management of temperature, humidity and air recirculation inside the chamber which, combined with the patented oxygenation system OxigenKLIMA, allows to reproduce the ideal conditions for quality maturation in perfect biosecurity, reducing unpleasant odor, the dangers of decomposition and bacterial proliferation.

Thanks to KLIMA FISH the best fish will no longer be the one just caught, but the ripened one: the ageing of the fish is in fact a process that softens the meat, intensifies the flavors and increases the juiciness, allowing to extract and enhance all the organoleptic characteristics of the fish which otherwise would be quite neutral.

This innovative ageing technique can go even beyond thirty days on large-sized fish with pink meat and a greater quantity of intramuscular fat, with a significant improvement also from the point of view of texture on the palate and digestibility.

## The advantages of our patents

## ACCESSORIES ON DEMAND

### RAILS COUPLE

Stainless steel guides with anti-tipping system. Simple to remove and move.

### STEEL or RILSAN FRIDGE RACK

The grill is the optimal support surface to allow the diffusion of the microclimate.

### TUBULAR HOOK

Stainless steel tubular hook with two sliding hooks for hanging fishes.

### WHEELS

Wheels kit with bearings. One wheel is with brakes.

### GSM MONITORING AND SUPERVISORY SYSTEM

Automatic alarm call in case of anomalies during processes.  
(Available only for System models)
